

How to Send Medical Imaging

Option 1: Facility push images to Powershare Network

Most practices/facilities have access to Nuance Powershare Network and may share images to outside physicians through this secure online portal. If the facility has shared images to our clinic before, they may directly share images from their system. If the facility has not previously shared images to our clinic, they will need to request The Steadman Clinic as their contact before sending.

If the facility has sent images to our clinic, they can 'Share Images' immediately on their portal.

No Shared Images Pinned	4	4			
▼ Patients					
No Patients Pinned		-			

If the facility has not sent images to our clinic, they will need to request our clinic as a contact before sending images.
